

CUSTOMER TESTIMONIALS

"I am always trying to find solutions to issues that arise during fabrication and installation of our countertops. It seems that every job is unique, be it new or remodel. The access to the job is never easy, or if it is, they are tiling it that day and you have to go the hard way. All the electrical, trim, and final touches have already been done, making the install the hardest possible for your crew. The countertops have to be "pancaked" into place, etc, etc. A couple of years ago I purchased a couple of "Hole Savers" from Omni Cubed. I liked how confident I was with the stone during install. When I ordered more I saw the Pro Cart on the web site and bought it. Impressed with the Pro Cart I thought I could save some money, I then bought a non-omni import brand cart and upon receiving it I had to re-weld the joints and reapply the rubber liner. I now own the Pro Anchor (great tool), Aqua Jaw for 6 cm bull nosed countertops and large islands, Pro Dolly set, and the Stealth Seam Setter. I feel the tools have paid for themselves in a very short time because of little breakage, easier and faster installs, and safety. We use our equipment to its maximum capacity. Any issues I have had, I simply call Omni Cubed and they take care of the issue right away. Thanks for the confidence in your product!"

— Bill Heim, Heim Granite

"I'm quite impressed the quick service Omni Cubed offered and I told my lead installer that we will definitely stick to Omni Cubed product once I need one more!"

— Benjamin, Winnipeg Stone Tops (Canada)

"We were very excited to finally find stone installation tools that actually make the installation process easier and safer, which boosts employee morale. The Aqua-Jaw clamps are easy to use and an invaluable addition to the install crew. We have done several episodes of the DIY show Kitchen Crashers, and have had many compliments on how professional we look with these tools!"

— MARIO LEMONCELLO, Top Installations, Inc.

"We at Granite Works truthfully love your products they are literal lifesavers."

— **Jon Ruhga, Granite Works USA**

"The new Mega-Jaws work great and the white braided hose is a nice addition. I am very impressed with Omni Cubed - no wonder our shop and trucks are full of Omni products! Your company is doing an outstanding job creating and re-designing products for our industry. I look forward to seeing what Omni has coming in the future."

— **DARRYL SCHIMPF, Urban Granite**

"I think the most important benefit of the Mega-Jaws is that they're so secure; I'd recommend them to anyone!"

— **FERNANDO ZAMBRANO, Idea Kitchen and Bath II Inc**

"I had a set of "sissier" clamps with foam pads, but they just kept slipping. A friend of mine saw you at Stone Expo and said your clamps opened wider and he thought they would hold better, so I gave them a try. He was right, the rubber on your clamp is a lot "grippier" than the foam ones I had, and I like that they open wide enough to carry 6cm pieces."

— **BILL CASSELL, Innovative Stone Solutions**

"Our shop here in Boulder, CO has seen a big increase in customers and designers requesting mitered edges to achieve a thicker looking counter top without having a laminated (sandwich) edge. The time required to lay-up such an edge was taking quite a bit longer than the standard laminating process so we started looking for a clamp made for this type of work. Most of the clamps we found required an extra step of flipping the material to set the edge or required moving the material off the table a good distance to allow clearance for the clamping function. All these issues were resolved with the Omni Miter-it clamp. Our fabricators were skeptical at first with the simplicity of the design, then asked us to order more clamps after the first job went so smooth. The miter process is now faster for us than the laminating process and we are able to sell this better looking edge for more \$ than the lam at a lower fabrication cost. We are super happy with all the products from Omni and this clamp is certainly a winner with us."

— **MARK STRAWN, Moros Fabrication**

"The Lam-Clamps are way faster than c-clamps, and the seams come out really tight. We are more than happy with how good they work!"

— **DOUG PARSONS, Elegance in Stone**

"Your clamps are awesome... I love them... in fact I need to order some more!"

— **PAUL VARSEK, American Marble & Granite**

"Not one broken lam strip! When waterjet cutting curved stone, it gets expensive. You don't want to have to recut something. Especially with antique stone! Your clamps arrived in the nick of time for a big lamination project for a restaurant called Orson. I had a big deadline for a restaurant job where I had to use this unusual stone (unusual because it's quarried out of Columbia, California in the early 1900's, and you can only get it when it's salvaged from an old building). In this case, it's from an old Post Office lavatory! I can't really get this stone any thicker than 1" so I knew I needed to laminate. After I got your clamps I was able to work by myself with rapid ease gluing these counters up. I just could not believe how fast I could do this, with plenty of time left over to clean out the excess glue being squeezed out. Money well spent because it practically paid for itself on this job alone. Thanks again, friends. I'll send you another set of pictures when we're done with this restaurant."

— MARK HAMILTON, Hamilton Schwarhoff, Inc.

"Lam-Clamps are the most secure & fastest way produce consistently tight seams for edge build-ups. They apply consistent evenly distributed pressure, try them once and you'll never go back. The quality of the design, as well as the fit and finish of the Lam-Clamps is on par with what you've come to expect out of Omni Cubed equipment. These clamps have improved our speed of production and quality of finished product. I wish I wouldn't have waited so long to purchase them."

— DAVE BECKER, CCMG

"The Lam-Clamp™ is saving me time because they are so easy to use, which means I am saving money... I like that. I recommend them to other companies who want to run a more efficient fabrication department."

— ALEX FRIEDMAN, Picasso Granite & Marble

"Since switching to Lam-Clamps over three years ago, our labor time has been reduced significantly and we are able to produce an even tighter lam-line. Bottom line... Lam-Clamps are faster, easier, and produce a tighter seam than any other clamp we've tried. We love our Lam-Clamps!"

— DIKO CHEKIAN, Prestige Surface Works

"I like these clamps because they are much faster and the handles don't hurt my hands like c-clamps."

— EDDIE ALVAREZ, Performance Tile & Stone

"We try to mostly fab 3 cm stone because we don't like laminating, but these clamps make the job a lot faster and easier. I just ordered 20 more!"

— HAROLD CHRISTIANSEN, Creative Surfaces

"It's a great product. I'm very happy with the clamp's performance."

— JOHN KOZLOWSKI, Better Way Stone Surfaces

"The glue comes off easy, the seams come out really tight, and the clamps are way faster than c-clamps. The angled piece works excellent for wide lam strips. I don't need c-clamps anymore and I will never go back after using the Lam-Clamp™!"

— JUAN ARIAS, Performance Tile & Stone

"Weight: good weight - not too heavy - we are used to heavy steel bars and hand clamps. This product is not too heavy, it is easy to put on, and maneuver the pieces without adding much excess weight to the stone.

Easy to use: The product is simple and straightforward, anyone can figure out how to use it. It truly does perform its function and save a lot of stress of getting pieces in and out, it is an efficient and a highly valued tool."

— Charles Stearns, Artistic Tile & Granite

"The 90° Manual Stealth Seamer has reduced install time thanks to it giving a consistent and reliable method for securing panels and miter legs. It saves time on site because we don't have to keep checking for movement. I would recommend this product to anyone who wants consistent results!"

— RICHARD PRESTON, Marble Building Products

"The Omni Cubed 90D's are a great tool! We are a small shop that doesn't have the time and money to make major mistakes, so investing in the right tools is what we have done. These tools rock just like all the other Omni Cubed tools we have! They do take a practice run or two to get used to, but after that your next mitered waterfall is going to look great and be super quick and easy. Having the best tools for the job really does make a difference, and Omni Cubed has supplied us with some great ones!"

— TYLER REL, Stone Wild Quartz and Granite

"I just want to say that I'm really happy with the 90D Stealth seamer, it's everything I hoped for in a tool. It does what it should do, it's durable, makes installation goes smooth! The installation process goes way faster when I use the 90D Stealth! I will most definitely keep adding to my collection!"

— ITAMAR OLIVEIRA, Stone Wild Quartz and Granite

"I purchased the Stealth Seamer Automatic about a year ago for a specific job of wall panels and it worked great! We use it every day and wouldn't want to be without it. Thank you!"

— KEN BLEH, Cincinnati StoneWorks

"I've used a bunch of other seamers—Abaco, Gorilla Grips, and the knockoffs—but nothing compares. I love it! Omni Cubed's tools are by far way more effective than any other brand of tooling for stone handling, and the time savings is unbelievable! These tools are a must-have for anyone who has to set countertops and do seams."

— STEVE DIAZ, Coastal Marble and Granite

"The Stealth Seamer Automatic is a great product, I am very pleased with the quality and the performance. It is very well built and gives a better seam appearance in much less time. We actually purchased a second one and will be purchasing a third one soon! When we did have one small problem with one of our pumps, we called Omni3 and they were there to help resolve the problem. They actually exceeded the service I expected. It was nice to have a knowledgeable person to deal with. We will be purchasing more of your other products as we need them. Keep up the quality and the good service! We will be looking to Omni3 for any products we need in the future."

— MARC RUMPLER, Surface Art Countertops, Inc.

"After having a Stealth Seam Setter for a couple of years I would say this is the most durable tool that I've ever bought! We use it daily! After owning one I refuse to make a seam without it! Seams only take minutes to set, and if you have a crown in the Granite it's not a big deal anymore. Before I initially bought it I was skeptical wondering if it was worth the price. I was wrong it's definitely worth double the price. Thank you for all that you do Omni Cubed, and I hope that God continues to bless your business."

— DAVID KLIMIS, Designers Choice

"They love the way it will quickly fine tune the level of the stone. They also love how much room they have to work the seam and clean up excess adhesive while the Stealth is on the seam. Having the option to run off a 9 volt battery also comes in handy. The quality of the product and the materials used is top notch. This tool is built to withstand everyday use and last for years to come."

— KRIS JORGENSEN, Natural Stone Interiors

"We are blown away with the automatic Stealth Seamer™! This will really speed up our time in the field. What a beautiful seam, we tried it for the first time yesterday on a 34" seam and the customer was more than pleased. We love new technology and you have definitely hit this one out of the ballpark!"

— LARRY BARE, Stone Craftsmen, LLC

"The Omni Cubed Stealth Seamer is awesome. Quiet and has more room between pads to scrape seams than other seam setters. I like its ease of use and it gets jobs done faster. Going to order 2 for every truck."

— PATRICK KELLY, Sims Lohman

"The Stealth Seamers have saved us considerable time in installation, given us perfect... I mean perfect seams, and they give us a ""wow' factor by our clients that shows them we really do have the right tools to do the job. We often use two sets at the same time because of the size of the tops or the location we are working in. We also use Stealth Seamers in all of our hotel installations for hanging wall panels and large tub surround panels. By far the best tool on the market for getting perfect seams and level panels, no question. This has cut our installation time by at least a 1/3 and has given us better results than any other technique we've used over the years. As a side note. We use a lot, I mean a lot, of stone fabricated in China. It is nearly impossible to get perfect stone from any shop in China - different thicknesses, hand polish slabs, warping, etc. Because of the power of the suction cups and heavy duty leveling bolts we can literally bend the granite to create a perfect seam even with substandard stone. Very cool. Thank you for an outstanding product that really has changed the quality of our installation."

— ARRON DECKER, D&D Hotel Development

"As with all of the Omni Cubed products that we currently use our new Pro Anchor machine is no exception and has exceeded our expectations. The Pro Anchor has all the design elements needed to put it out in front of the competition, with the split zones and lightweight but sturdy construction, not mention the ease of use. You usually get what you pay for, so when you can purchase a piece of equipment and feel like you got more than what you paid for as we have with the Pro Anchor, it's a win/win scenario that doesn't happen often. Hopefully Omni Cubed will continue to bring more innovative, cost effective tooling that really works to the market, that allows the fabricator to get the biggest bang for the dollar especially now when every dollar counts."

— Jeff Coombs, Constrata Surface Innovations

"Thank you very much for your help in making our jobs easier. Like I said over the phone, we have been working with your Pro-Anchor for quite a while now, and we couldn't be any happier. My guys really enjoy working with a piece of equipment that makes the task easier and more consistent. Keep up the good work."

— Manny Lemus, Marble Today, Inc.

"Buying the Pro-Cart AT1 was the best money I've ever spent on a stone tool. Even after 6 years of using it, you'll still hear "have I told you how much I love this cart". You can walk away from it with a big island or peninsula clamped in without worrying about it falling over. The cart is also lightweight but really stiff, so it reinforces the stone against breaking. It has the big pieces setting high enough that they almost load themselves when rolled onto the cabinet. It doesn't seem to matter what surface you're on, it rolls easily and makes it easy to get up a couple of steps or over low obstacles like thresholds and such. I would recommend this cart to all who install stone slabs."

— SCOTT PETRIE, Petrie's Stonework

"The Fallen Heroes Memorial would not have been possible without the generosity of good folks like Omni Cubed. We truly appreciate the support. It means a lot to me and those we serve. Here's a picture of the completed dog tag memorial flag. It's pretty amazing and we hope it has a large impact on many. The Pro-Cart AT1 worked great to transport the individual sections of this traveling memorial."

— JAMES HOWARD, VAU

"The Pro-Cart is absolutely the best thing we've ever bought for heavy quartz tops. We can clamp monster pieces onto this thing, roll em right down the ramp out of the truck, (no ground clearance issues even with long tops), across the yard if need be, up 1-2 steps without really lifting, cross thresholds etc. 52" x 118" island last week (~700#). No issues, very safe installation."

— MATT KRAFT, Custom Marble, Inc.

"We use several Omni products (AT1, Pro Dolly, Sink Hole Saver, etc.) currently and we feel that they have helped streamline our systems of transporting and installing granite in such a positive way that it has allowed for our business to not only prospect for larger volume and land those contracts, but to look towards growing our staff to double the size in 2014. These products have increased our ability to effectively and efficiently move large quantities of granite countertops from warehouse to trailer, trailer to fabrication shop, and from the shop up to the units. As a Union shop, time is money and these carts have positively affected our bottom line by allowing our guys to work faster, safer, and more efficiently. We use the AT1 side by side with the Pro Dolly carts for maximum effectiveness, especially on commercial jobs with elevators. These carts are worth their weight in gold, and we are truly grateful to have a vendor like Omni Cubed "on our team"."

— JAY MAHAFFEY, MOSAICA

"My install crews were skeptical at first because of the light weight and compact design. I wish you could have heard them when we had a large piece to go in a residence. They were amazed at how it stayed in place when going up steps. Now they won't even consider using our other carts. Thanks for making their job easier. I highly recommend that every install crew have your Pro-Cart."

— CHIP CARNEVALE, Pietra Naturale Inc.

"I have used your Pro-Cart AT1 for about 3 years and can't tell you how much just this cart alone has helped to improve our company. It helps our installers save their backs and ensures that our pieces are being delivered with caution. Thanks!"

— BRIAN MARKIEL, GM Marble

"I wasn't sure about the Pro-Cart cart at first because it's so different from the carts we have already, but we decided to give it a try, and what a surprise! We have had pieces in it that were 72x112 inches and it was still remarkably stable. We like how the cart attaches directly to the stone allowing you to maneuver the pieces up stairs with a lot less effort and with only two men. We just finished a 16 unit condo (with a lot of stairs) and your cart was amazing. Thanks!"

— BILL CASSELL, Innovative Stone Solutions

"They call it the NASA ('cause it's like a rocket for installation) go figure! Another thing they really like is how much it helps taking large pieces up or down stairs. Anyway, they use it all the time and it makes getting the stone into the house way faster and safer with fewer guys, and that saves me money! Thanks!"

— DIKO CHEKIAN, Prestige SurfaceWorks

"We investigated using the Pro-Cart to help us transport a very intricate 3cm granite island (approx. size 72" x 118") into a home in the \$3MM range. After talking to the Omni Cubed engineer, we made the decision to purchase the cart, even though the weight of the island was in excess of the rating on the cart. The cart performed flawlessly. In addition, we left the cart attached to the island top during the entire installation process. The only lifting (by hand and 8 men) was to transfer the island top from an A-frame on a trailer to the cart. The Pro-Cart made a potentially dangerous and difficult installation relatively easy. I would highly recommend this cart."

— JEFF BOGNAR, Granite, Marble, and Tile Solutions, LLC

"Just wanted to drop another note to tell you how pleased we are with the Pro-Cart! We just used it on a small job where we didn't even need it and it was awesome! We only had 30 ft to bring a 7'x2', 3cm counter in (& 3 more slightly smaller) and even though conventional wisdom said there was no need for the cart; it just made it so much easier to do the job. It remains one of my top two tool purchases in the last 3 years with the other being your "Aqua Jaws". Having the cart is like having an extra employee that I don't have to pay. Thanks for making my job easier!"

— **DAVE WORRELL, Innovative Stone and Tile, Inc.**

"I just wanted to take a minute to say Thank You to the folks at Omni Cubed for their well-designed products. The look and comments of the install crew after a tough install was priceless: Where was this ten years ago! Its about time! We have the Pro-Cart AT1, Aqua-Jaw clamps, and Sink Hole Savers, and I've received the go-ahead get us the Pro-Lift Automatic lifting cart. We look forward to using any products from Omni Cubed."

— **JOE SANTORO, Bianchi Marble and Granite**

"I have been a loyal customer of your stuff for the last 6 years and will continue adding to it!! There is no way I could do what I do on a day to day basis without your innovative products."

— **Tyler Cantrell, Supreme Stoneworks LLC**

"The Pro-Cart AT2 is a really good cart. It is strong, safe, and comfortable to use. Buying this cart was a good choice and I would recommend it to other fabricators. Thank you!"

— **RODNEY OROZCO, Marble Today**

"Life made slightly easier...Went on an install with my guys today to help stick a large island. As we were getting ready to take it in the house I thought to myself, "These guys make some great granite tools." [Your tools] save me time, money and work comp claims and it makes for HAPPY installers. Omni Cubed keep up the great work and thanks for making an already hard job much easier and safer for all of us. You Rock!"

— **CHRIS EVANS, Rock Solid Granite and Tile, Inc.**

"I have been an AT1 cart user for years now. We enjoy 13 AT1 carts in our fleet. Last year, we stepped up to the AT2 transport cart for larger islands and everyone was happy we did. The cart is so versatile, light weight and with the upright tilt feature, it is a breeze to bank the largest islands into place. It has reduced injuries 50% over the previous year – it is a safe way to move material. Installing 25 kitchens each day would be nearly impossible without Omni Cubed products. I use and highly recommend all of the Omni Cubed product line."

— **LARRY WOOLDRIDGE, Top Master, Inc**

"We use the Pro-Dolly™ (aka "The Little Hummer") whenever we have large pieces that we need to maneuver into a house. Since each one has a weight limit of 750#, we actually use 2 of them, one on each end, for the large pieces. It makes it much easier to turn corners and position the slab where we need it in order to set it in place. Also, it is great that it holds the slab fairly close to the floor, so we rarely have to worry about the height of a large piece and how to get it in our delivery truck, because we gain a few crucial inches of headroom, compared to wheeling it up the ramp on a drywall cart. Ever since we bought the Pro-Dolly™, we've been able to keep the same installers. Nobody calls in sick any more when we have a humongous island to install."

— ALEX HERNÁNDEZ, Keystone Marble & Granite, Inc.

"Omni Cubed helps Mosaica HardSurface work smarter not harder. Challenged to move over 4000 lbs of granite up two flights to assemble a rooftop bar in downtown Minneapolis, the Pro-Dolly did the bulk majority of our "heavy lifting". The best feature is its ease of mobility, specifically with oversized, heavy material. It saves wear and tear on the body and has helped increase revenue by allowing us to "manually" handle pieces that otherwise would have required more staff, equipment, etc. We are in our 3rd year of using Omni products and they continue to be a life saver for us."

— JAY MAHAFFEY, Mosaica HardSurface

"I love Omni Cubed products! Installing concrete countertops that are a solid 2 inches thick is not easy at 24 lb per square foot! But thanks to Omni Cubed's Pro-Dolly it's now much easier. I can't believe there was ever a time we did it without! Do not allow your passions to permanently injure anyone; do the right thing and invest in the proper equipment. I bought a set of HD1 dollies along with a pair of aqua jaws. I hesitated spending the money at first but so glad that I did. Using the right equipment made installing this 700 lb top 10 times easier. This will help prevent people from getting hurt and if it prevents one person from getting hurt it is totally worth the cost. Thank you Omni Cubed!! Your awesome products made our lives easier."

— LUCAS VAN DER MERWE, Concrete Creations

"The Pro-Dolly really makes our job easier; it saves time and is safer for my workers. Being able to clamp the dolly to the stone is amazing!"

— SANTO LIGUORI, Progressive Dimensions

"This dolly is great! Now we can carry islands in easily without breaking our backs! This is the best investment I've made, I highly recommend Omni Cubed tools!"

— DARIO NAVARRO, LG Marble & Granite

"I have installed stone for 10 years working for someone else. When I started installing on my own I saw the Pro-Dolly and decided to give it a try. It is by far the best tool I have ever used in the last 15 years of installing tops! I install 1500-2000 square feet a month. I loaned the Pro-Dolly to another installer and bought another later that day, so now I own two. I use them on every top we carry from small pieces to giant full slab islands. We never have to set the stone down, we just roll that baby around corners, up and down hills, and right into the kitchen (the mobility is unbelievable). If you install stone, YOU NEED THIS TOOL. The days of struggling carrying tops is over."

— DAVE BUCKLEY, DB Stone

"The Pro Dolly HD2 was great on this job! I was able to get this big island off the trailer and through the doorway, with a couple of inches to spare. It was very stable and we were able to tilt the piece onto the cabinets with the dolly still attached. I bought the HD2 for this install, and now I plan on getting another one soon."

— DAVE WORRELL, Innovative Stone

"We've been using the prototype Pro Lift for about a year now. I had been talking to Larry for years about the need for a lift cart and they really hit it out of the park. Having a safe and reliable cart that can lift a 3cm slab sized island on and off the truck, into the home and on to the cabinets is a huge breakthrough for our industry. It pays for itself in reduced manpower, reduced injuries and reduced damage. In most cases a 3-4 man job can be accomplished with 2 men and a Pro Lift. I applaud the team at Omni Cubed for continuing to improve the safety and efficiency of our industry - Well Done!"

— NATE KOLENSKI, Block Tops, Inc.

"I bought one of those lifting carts that runs off the 28 volt battery, man I love that thing. It has done everything as advertised. We've mainly used it to set islands, and actually the other day we did a 125" by 55" island with it, no problem! If these islands get any bigger we are going to have to start taking off the roof of the house and setting them with a helicopter!"

— DANNY PARKER, P & P Woodworks

"Saves me a lot of money, saves my back, and saves my dad's back. This is a family business and we have been doing this for 15 years. I want to take care of my family and my dad and brother. It's a great machine, I love it! You could take any tool from my shop but this is not leaving me."

— ABDULLA VELAGIC

"Words cannot express how much we have enjoyed using the Pro-Lift. I was hoping for an easier way to get heavy granite tops onto cabinets, and your cart fit the bill. Even for the regrettable "L" and bar tops! We have successfully used the cart for over 6 months with zero "mishaps." We are a small father and son operation, and the Pro-Lift has provided that third or even fourth person assistance. Rated at 1,000 pounds, we can testify that it can lift every bit of it. I expected to only use it for extreme circumstances, but it's so easy to operate that we end up using it more often than not. Thank you for providing our industry with a very well thought-out piece of equipment. We don't have to fear back injuries when we install heavy pieces of countertops. My only fear now is when I forget to charge the battery."

— BOBBY SERNA, Sacramento Stone Works

"Installing countertops for the past ten years and Omni Cubed's ProLift is an indispensable component of our install process. Makes transporting massive islands a breeze."

— Pablo Soares, Pablo Marble and Granite

"Just got a Pro-Lift... We wish this was out 20 years ago! If it was, I wouldn't have pain in my knees and back. These islands we do now are pretty much full slabs with the edges trimmed off. We have your clamps and all kinds of the Sink Hole Saver rails—everything works great."

— RICKY WHITEHEAD, GL Granite Shop

"We bought the Pro-Lift to use on big jobs, but now we use it on almost every job, big or small. My son and I were manually carrying a countertop the other day and I thought, "Why aren't we using the Pro-Lift? It's right there in the truck!" The next day we were going to move a similar sized piece and I went straight for the Pro-Lift."

— BOBBY SERNA, Sacramento Stone Works
